If the local situation allows it, the event will take place in its original location with an option for all authors to present remotely. In any case, all matters related to **publication** and **indexing will remain unchanged**.

SCOPE

Nowadays, cities are responsible for consuming about 75% of primary energy and for emitting more than 50% of the world's total greenhouse gases. In the perspective to reduce the influence of climate change, while preserving the importance of social prosperity, the broad subject of Sustainable Energy is absolutely important for ensuring stability between economic growth and environmental sustainability. Therefore, new technologies are emerging, especially for the successful operation of future Smart Cities. The main objective of the International Conference on **Sustainable Energy for Smart Cities (SESC)** 2021 conference is to provide a multidisciplinary scientific meeting toward answering the complex technological problems of emergent Smart Cities.

We are pleased to invite you to submit your paper to [EAI SESC 2021](#). Submissions should be in English, following the **Springer** formatting guidelines (see [Submission](#)).
